

**3. LÉKAŘSKÁ FAKULTA**  
Univerzita Karlova

## **Division of Cell and Molecular Biology**

### **Department of Biochemistry, Cell and Molecular Biology**

### **Third Faculty of Medicine, Charles University, Prague**

**will admit Ph.D. students**

for following projects:

- 1. Molecular mechanisms of the resistance of cancer cells to chemotherapeutics**
- 2. Molecular mechanisms of the regulation of function and viability of pancreatic beta cells**
- 3. Molecular mechanisms of the effect of iron accumulation on the function of critical tissues**

Detailed annotation of presented projects can be obtained at the contact e-mail. The offer is valid for students graduated in relevant natural sciences as well as medicine. We offer half-time appointment together with stipend.
