

**Seminar of the Charles University Centre of Excellence
UNCE SCI/014**

Wednesday, October 24, 2018 (seminar room CH-9)

14:50-14:55 Opening (J. Jindřich)

14:55-15:15 Eliška Matoušová: *Enantioselective synthesis of alkaloid-like polycyclic compounds with all-carbon quaternary centres*

15:15-15:35 Bedřich Formánek: *Organocatalytic synthesis of chiral allylic amines via asymmetric amination of Morita-Baylis-Hillman adducts*

15:35-15:55 Matěj Horvath: *Study of protein-protein interactions between 14-3-3 protein and death-associated protein kinase 2*

15:55-16:05 Break

16:05-16:25 Jianwei Li: *Synthesis of block copolymers for preparation of nanomaterials based on weak interactions*

16:25-16:45 Jiří Schulz: *Structure, Reactivity and Electrochemical Behaviour of Gold(I) Clusters Supported by (Diphenylphosphino)ferrocene*

16:45-17:05 Peter Urbanovský: *Two metal ions in two cavities with phosphinate bridging moieties*

17:05 Closing
