

**Seminar of the Charles University Centre of Excellence
UNCE SCI/014**

Wednesday, June 5, 2019 (seminar room CH-3)

14:00-14:05 Opening (T. Obšil)

14:10-14:30 Tomáš Křížek: *Capillary electrophoresis as a versatile tool for analysis of engine coolants*

14:30-14:50 Marcel Ehn: *Cyclam-based ligands for Copper (II) complexation*

14:50-15:10 Bogdana Bashta: *Functional microporous polymer networks prepared by combination of chain-growth polymerization and template approach*

15:10-15:20 Break

15:20-15:40 Ondřej Bárta: *Comparing the performance of ferrocene phosphinonitrile ligands in gold(I)-catalyzed reactions*

15:40-16:00 Jan Ulč: *C-C/C-H bond activation sequence: route to the tetrasubstituted naphthoquinolizinium salts*

16:20-16:40 Anton Nechaev: *Synthesis of polysubstituted naphthalenes via palladium-catalyzed tandem reaction*

16:40 Closing
