

**Departments of Inorganic and of Organic and Nuclear Chemistry
at the Faculty of Science, Charles University in Prague**

invite for a lecture, which is as part of the lecture series

Quo vadis Chemistry:

**Synthesis of Planar-chiral Ferrocene
Derivatives. Use in Materials Chemistry,
Coordination Chemistry and
Asymmetric Catalysis.**

The lecture will be delivered by

Dr Eric Manoury

from the Laboratoire de Chimie de Coordination, CNRS, Toulouse
(France) on **Monday, October 10th, 2011 at 14:00** in the lecture hall
CH-2 at the Department of Inorganic Chemistry, Faculty of Science,
Charles University, Hlavova 2030, Prague.

Petr Štěpnička
