

Conditions of the 2nd admission procedure for doctoral study programmes at the Faculty of Science, Charles University, for the academic year 2022/2023

The admission procedure is initiated by a completely and correctly filled application and by a payment of the admission fee. Both things must be done by 15th December 2022.

Conditions for admission

- The applicants must finish their master studies and provide a confirmation of such no later than on 28th February 2023.
The applicants with a diploma from Czech universities will provide an authenticated copy of their diploma or an original confirmation of completion of a master study programme. This is not required from applicants who have completed their studies at Charles University.
The applicants from universities abroad will provide such a proof in one of the manners described at the following link: <https://www.natur.cuni.cz/eng/study/applicants/education-obtained-abroad/nostrification-for-applicants-for-master-and-doctoral-programmes-of-study>
- Successful passing of the entrance exam
- All the applicants who obtain at least 50 points (out of 100) at the exam will be accepted.

Application for a doctoral study programme and the admission fee

The **application** is submitted electronically through the Charles University study information system at <https://is.cuni.cz/studium/prijimacky>. The completed application must be **submitted electronically** in the study information system no later than on 15th December 2022 (**no** hard copy is sent by mail). The e-mail address and password provided are used to access the system throughout the whole admission procedure.

If a student is interested in multiple study programmes, separate applications must be submitted for each programme.

Application appendices:

- Curriculum vitae (obligatory)
- Transcript of current master's study courses or addendum to master's diploma (obligatory)
- Brief summary of a planned doctoral project (not obligatory, but it gains the applicant extra points)
- List of applicant's published and unpublished work (or expert assessments of this work) and other documentation worth consideration (e.g. documentation of specialized courses completed, language examinations). (optional)

The **admission fee** is 720 CZK and it is paid for each submitted application. It must be paid by 15th December, 2022.

Payment information:

Account name: Univerzita Karlova

Account number: 19-2764980247/0100, KB Praha – město, Václavské náměstí 42, 114 07, Praha 1

Constant symbol: 0308

Variable symbol: 988018

IBAN: CZ8701000000192764980247

SWIFT (BIC): KOMBCZPPXXX

Specific symbol: ID number generated by the information system after filling out the application. In the note for the recipient provide the name of the candidate.

If paying from abroad, you need to **pay all fees** related to the transfer.

If the application does not meet all the requirements or the admission has not been paid, the faculty will ask the candidate to correct these issues and provide him/her with an adequate time to do so. If the applicant fails to correct the issues, the application will not be processed. Fees are non-refundable.

Entrance exam

Regular date: 3rd February 2023

Alternative date: 10th February 2023

The **invitation** for the entrance exam is **only sent in electronically** through the university's electronic information system no later than 30 days before the date of the exam. If the faculty sends an invitation for an alternative date of the entrance exam, this deadline may be shortened accordingly.

Entrance exam on an **alternative date** may be permitted by the dean to candidates who submit a written request **within three days** after the regular exam date. Only serious reasons are grounds for granting an alternative date, particularly health reasons. The request must be sufficiently justified in writing and the circumstances stated in the request must be documented. A second alternative date is not permitted. The request for an alternative day **is submitted and approved via the electronic information system**.

A candidate may, **for reasons of a physical handicap**, including specific learning disorders, request adaptation of the entrance exam. The request must state specific adaptation requirements for the entrance exam, and it must be accompanied by a medical report or a statement from a competent professional facility. Decisions on requests are made by the dean. If necessary, the dean may request additional documentation.

The request must **be submitted electronically** by 6th January 2023 via the information system of the university. Medical handicap requests made later (e.g. during appeal) cannot be taken into account.

- The entrance exam is one round, and it consists of one or more parts (as specified for individual study programmes).
- Based on a written request submitted electronically together with the application, but no later than by 6th January 2023, the dean may permit that the entrance exam will take place via information and communication technology, but only for serious and documented reasons such as health or study abroad.
- During the entrance examination the candidate must demonstrate the technical and linguistic skills to study the given field, along with abilities necessary for independent scientific work.
- The examination is graded with a maximum of 100 points, of which up to 30 points may be awarded as a bonus for giving a more specific idea of the study content and planned dissertation in the voluntary application appendix, including the dissertation topic, a brief annotation, an anticipated supervising department and the consent of a specific supervisor to supervise such doctoral project. The number of points that can be awarded in this way is specified for individual study programmes. Optional attachments can be added to the application in the electronic information system until 6th January 2023.

Access to own file

After receiving the dean's decision on the result of the admissions proceeding, the candidate is entitled to access his file. The organizational and administrative conditions for perusal are established by a dean's measure.

Overview of doctoral study programmes in the academic year 2022/2023

All the study programmes are both full-time and part-time study, the standard length of study is 4 years, the languages of instruction are Czech and English.		
Study programmes without specialization	Information about the entrance exam <i>The interview will deal mainly with the dissertation plane and candidate's knowledge in the given field of study. Extra requirements are listed for each study programme.</i>	Possible bonus points
Physical Chemistry	Since the interview includes an assessment of the candidate's ability to communicate in English, the candidate prepares a roughly 3-minute presentation in English (no more than 5 minutes) in which they tell the committee about the results of their master thesis, potentially with an abstract of their publication. There is no access to a projector. The committee asks questions in English too.	30
Macromolecular Chemistry	Since the interview includes an assessment of the candidate's ability to communicate in English, the candidate prepares a roughly 3-minute presentation in English (no more than 5 minutes) in which they tell the committee about the results of their master thesis, potentially with an abstract of their publication. There is no access to a projector. The committee asks questions in English too.	30
Modelling of Chemical Properties of Nano- and Biostructures	The exam is taken in English. It consists of three parts: 1) Past scientific work of the candidate (who prepares a 3–5-minute presentation) 2) Candidate's motivation and their plan of doctoral research 3) Examination of skills necessary for computer modelling (esp. physical chemistry and chemical physics)	0
Organic Chemistry	Written preparation takes one hour. After that, the candidates are invited to an oral exam. It consists of two parts:	0

	<p>1) Short introduction of a planned doctoral project</p> <p>2) Test of knowledge of organic chemistry (based on the book Organic Chemistry by John McMurry).</p>	
Botany	<p>The candidate presents the committee with a topic proposal and content of thesis (hard copy and electronically). It is recommended to have the proposal signed by a potential supervisor. The proposal should include its scientific contribution, possibilities of realization and funding, relevance to the existing teams in the field. The length of the proposal is usually between 1 and 3 pages. For the entrance exam, the candidate prepares a presentation of the planned thesis content (circa 10 minutes). The committee assesses the candidate's knowledge and, above all, this presentation, relevance of the topic and clarity of the ideas presented.</p>	30
Ecology		30
Experimental Plant Biology	<p>The committee assesses:</p> <ol style="list-style-type: none"> 1. The quality and presentation of the dissertation project. The candidate may attach the proposal to the application (optional supplement) or bring it to the exam. The committee assesses the content, the presentation and the reaction to the questions. The candidate is expected to prepare the proposal together with a potential supervisor. 2. The candidate's knowledge relevant to the field and their previous activities (e.g. master thesis) and their motivation. The candidate must demonstrate own knowledge in the field and especially in the areas related to the dissertation project. The candidate must also be able to ask relevant questions, formulate hypotheses and evaluate them critically. 3. The committee may also have a look at previous scientific activities and study results. 	20

<p>Molecular and Cellular Biology, Genetics and Virology <i>(biomedicine study programme)</i></p>	<p>The admission interview includes a brief (max. 5 minutes) presentation in English. During this presentation, the applicant discusses their future doctoral project or at least the general ideas about their doctoral activities and specialization. The applicant may also talk about their master studies or other professional experience. The presentation is done without a PowerPoint or other material prepared in advance. The committee then asks follow-up questions that are also in English. The applicant should also reply in English if possible.</p>	<p>10</p>
<p>Parasitology</p>	<p>The committee assesses:</p> <p>1) Quality and presentation of the doctoral project – <i>the candidate may attach a summary to their application as an optional supplement or they can bring it to the interview (hypothesis, the time plan and methodology). Both the presentation and the reaction to committee’s questions are assessed.</i></p> <p>2. Previous scientific work – <i>previous activities, especially (but not exclusively) those that are related to the doctoral project; publications and grant activities are prioritized</i></p> <p>3. Knowledge and orientation of the candidate in the field with special regards to the project – <i>the candidate must prove knowledge of the current affairs in the field and especially in the research related to the project, the candidate must show ability to evaluate scientific hypotheses, the committee may also pay attention to previous study results</i></p>	<p>30</p>
<p>Developmental and Cell Biology <i>(biomedicine study programme)</i></p>	<p>The entrance exam consists of more parts in forms of presentations, interviews and discussions based on written preparation (tasks given by the committee). The applicants present their results from their</p>	<p>0</p>

	<p>master studies (in English). The whole entrance exam takes place in one day.</p> <p>The list of possible topics and supervisors offered for the academic year 2022/2023 will be available on the website of the Department of Cell Biology after 1st March 2022. We recommend that the candidates contact the supervisors in advance to discuss available projects and their requirements.</p>	
Zoology		30
Environmental Science		15
Physical Geography and Geoecology	<p>The candidate prepares a written presentation (max 5,000 characters) and an approximately 10-minute oral presentation on the following:</p> <ol style="list-style-type: none"> 1) summary of previous scientific activities 2) brief presentation of the doctoral project <p>The committee assesses the candidate's overall motivation, their language abilities, previous scientific results, quality and feasibility of the doctoral project.</p>	0
Geoinformatics, Cartography and Remote Sensing	<p>The candidate prepares a written presentation (max 5,000 characters) and an approximately 10-minute oral presentation on the following:</p> <ol style="list-style-type: none"> 1) summary of previous scientific activities 2) brief presentation of the doctoral project <p>The committee assesses the candidate's overall motivation, their language abilities, previous scientific results, quality and feasibility of the doctoral project.</p>	10
