

Schedule registration

To participate in classes, students need not only to register for a course in SIS, but they also need to register for a schedule.

The registration takes place in SIS in the module *Subject and schedule registration* within a deadline that is published in the news in SIS.

Courses are organised in forms of lectures and seminars, or sometimes their combination. Seminars are held in smaller groups and there are often more possible schedules. If more time is assigned to a course, it can occur that such course (be it a lecture or a seminar) is divided into more time slots throughout the week. In such case, these slots are displayed in more lines in the schedule. The students participate only in the time slots they registered for.

Attention: The teachers of different slots of these courses often communicate only with the students from their own group (registered for one time slot), not with all the students registered for the course.

How to register for a schedule

First, set the correct year and semester (fig. 1).

Filter:

Year and semester: 2023/2024, winter semester [Change]

| | Semester | Eurocredits | | Range | Code | Title | Faculty | Registration | Type | Note | Schedule |
|---|----------|-------------|------|----------|------|-----------|------------------------------|--------------|-------------|-------------------|--|

Fig. 1: Display of courses registered in the module Subject and schedule registration

At the left side, you can find the icon  titled “schedule edit”.

You open a tab (fig. 2) with the schedule for the given course – all lectures and all seminars. The students register for these slots themselves, eventually they can be registered by the teacher or the department secretary.

The first-year students of bachelor programmes are usually already assigned to time slots for their obligatory courses. This means that all students who registered in time for their obligatory courses do not have to deal with any overlapping classes. The students may not be allowed to

change these time slots (e.g. with P.E. for the first-year students). When considering changes of schedule, think carefully about possible overlaps.

Each time slot has a certain capacity stated. After this capacity being full, it is not possible to register for the given time slot. If there is not free time slot for a course you are registered for, contact the guarantor of the given course.

For some practical lab classes organised in block classes, it may be possible to register for schedule only later on.

Fig. 2: Choosing the schedule (time slots)

The registration for a specific schedule (time slot) is done by clicking on the button next to the time slot you want to choose. After that, you confirm your selection by clicking **Enroll**.

If the operation is successful, you will get a confirmation and you will see the schedule next to the course in the list of the courses you are registered for.

| | winter | 3 | 2/2 C+Ex | --- | MB120P171 | Mycology (for teachers) | FS | preliminary | required | Lect: Mon 14:00 - 15:30, B12, RNDr. Alena Kubátová, CSc. Tut: Fri 11:30 - 13:00, B13, RNDr. Alena Kubátová, CSc. |
|--|--------|---|----------|-----|-----------|-------------------------|----|-------------|----------|---|

Fig. 3: Schedule information in the listed of registered courses

If there is no free place in the time slot you most want, you can register on a waiting list. Be careful when choosing the date you want to wait until because if the capacity appears in the time slot, you will be automatically moved to this given time slot.

 • Enter more detailed requirements for registration on the waiting list.

If you click on  **Tut: Mon 9:00 - 10:30, PUA, , Ing. Stanislav Saic, CSc.** in the list of your courses, you will be able to see details about the given time slot.

Practice in Computer Science MS710P07A

Name: Practice in Computer Science  

Hours per week: 1/1

Guarantors: RNDr. Jiří Makovička, CSc.  

Faculty: Faculty of Science

Language: Czech

Enrolled: 0 + 1 

Capacity: 180

Event capacities: Practicals 113

Actions:

Detailed overview 23aMS710P07Ax01

Type: Practicals

Repetition: Every week

Schedule: Monday 9:00

Place: PUA (Počítačová učebna) Albertov 6, Praha 2  

Duration: 90

Teachers: Ing. Stanislav Saic, CSc.  

Students:

Language: Czech

Public notice to the schedule:

Note for the attending students:

Current number of students: 1

Maximum number of students: 1

Online enrollment: yes

Fig. 5: Detailed information about the time slot you have chosen

Attention! It is necessary to see the difference between registering for a time slot in the schedule and registering for a course. Registering for a course does not mean choosing a schedule.

More information is at [this website](#).
