16th International Nutrition & Diagnostics Conference (INDC 2016)

The 16th International Nutrition & Diagnostics Conference (INDC 2016) will take place at Hotel DUO, Prague, Czech Republic, from October 3-6, 2016. INDC is chaired by Assoc. Prof. Aleš Horna and supported by the Czech Society for Nutrition and the Czech Society of Probiotics and Prebiotics.

INDC is an international forum for scientific discussion focused on understanding the relationship and connections between nutrition and clinical diagnostics.

The aim of this multidisciplinary conference is to bridge the gaps between the specialists and fields of science as diverse as nutrition, clinical biochemistry, food technology, analytical chemistry and medicine.

INDC is a traditional meeting point for people who are interested in understanding how food influences our health, working performance, feelings and aging. It is a meeting where people with expertise in the fields of medicine, chemical analysis and food technology gather to discuss what to eat or what to drink to keep fit.

The INDC conference represents an invaluable resource for nutritionists, medical doctors, analytical chemists, biochemists, chemists, and those in the clinical diagnosis seeking new technologies and new approaches. The meeting will feature an extensive scientific programme of lecture and poster presentations which will focus on providing the newest research results to address the diverse challenges faced by today's scientists.

Call for abstracts

Offers of oral and poster presentations are now invited for INDC 2016. Abstracts should be submitted online: <http://www.indc.cz/en/registration/abstracts/abstract-registration-form/>

Welcome to Prague

We are glad to host you in Prague, a vibrant and pulsating European city, whose endlessly long list of superb theatres, museums, galleries and clubs help to make up the unique character of this city of a "Hundred Spires". In combination with the world famous Czech beer and gastronomic delicacies, it is no wonder that it is one of the most visited cities in the world.

Topics

- Novel trends in food processing and diagnostics (nanotechnology, etc.)
- Food safety
- Food microbiology (including antibiotic resistance)
- Functional foods
- Food supplements
- Phytochemicals and natural antioxidants
- Nutrition and health
- Foodborne diseases
- Food chain and gut ecology
- Nutrition and development of immunity
- Nutrition and microbiota
- Nutrition related diseases

- Nutrition and clinical diagnostics
- Bringing together Biochemistry and Diagnostics
- Nutrients in detoxification and their mechanisms of action
- Targeted Nutritional Therapy (nutrition for sportsmen, nutrition supplements)
- To drink or not to drink wine
- Beer and Health - Beer in a healthy diet, Why to drink Czech beer
- Polyphenols and health
- Chemistry in the human
- Oxidative metabolism
- Phytoestrogens, isoflavones
- Probiotics, prebiotics and human health (the role of probiotics, prebiotics and biofoods)
- What to eat or not to eat to prevent cancer
- What to eat for weight control
- Analytical methods for analysis of biological
- Pediatric aspects of nutrition
- Vitamin D
- Fertility

Deadlines

Abstract submission for oral presentation: May 30, 2016

Abstract submission for poster presentation: July 31, 2016

Early registration: July 31, 2016

Secretariat
