Citační analýza

Sumární IF všech publikací uchazeče = 93,456
Celkový počet impaktovaných prací = 30
Celkový počet citací na práce uchazeče = 88 (WoS; bez autocitací), 99 (Scopus; bez autocitací)
h-index = 8

Citační analýza

Vales K, Svoboda J, Benkovicova K. Bubenikova-Valesova V, Stuchlík A: The difference in effect of mGluR 2/3 and mGluR5 agonists on cognitive impairment induced by MK-801, Eur. J. Pharmacol., 2010, in press (IF=2.787)

6. Horiguchi Masakuni; Huang Mei; Meltzer Herbert Y. Interaction of mGlu(2/3) agonism with clozapine and lurasidone to restore novel object recognition in subchronic phencyclidine-treated rats Source: Psychopharmacology Volume: 217 Issue: 1 Pages: 13-24

Stuchlík A, Petrasek T, Vales K. Serotonin-depleted rats are capable of learning in active place avoidance, a spatial task requiring cognitive coordination, Physiological Research, 2009 58(2), 299-303

Stuchlík A, Vales K. Baclofen dose-dependently disrupts learning in a place avoidance task requiring cognitive coordination, Physiology & Behavior, 2009; 97: 507-511

Stuchlik A, Petrasek T, Vales K. Dopamine D2 receptors and alpha1-adrenoceptors synergistically modulate locomotion and behavior of rats in a place avoidance task, Behavioural Brain Research, 2008 ; 189(1): 139-144

17. Bortolozzi A, Masana M, Diaz-Mataix L, et al. Dopamine release induced by atypical antipsychotics in prefrontal cortex requires 5-HT1A receptors but not 5-HT2A receptors International Journal of Neuropsychopharmacology Volume: 13 Issue: 10 Pages: 1299-1314

24. Yim, A.J., Andersen, M.L., Soeiro, A.C., Tufik, S., Oliveira, M.G.M. Acute systemic blockade of D2 receptors does not accelerate the extinction of cocaine-associated place preference 2009 Brain Research, 1304 pp. 122-128

Stuchlik A. Further study of the effects of dopaminergic D1 drugs on place avoidance behavior using pretraining: some negative evidence, Behav. Brain Res. 2007; 178(1): 47-52

38. Tran, A.H., Uwano, T., Kimura, T., Hori, E., Katsuki, M., Nishijo, H., Ono, T. Dopamine D1 receptor modulates hippocampal representation plasticity to spatial novelty.2008 Journal of Neuroscience 28 (50), pp. 13390-13400

41. Hua, Y., Hua, L., Xiang, M., Jing, L., Jing-Zao, C. Effects of infrasound on the proliferation and the expression of BDNF in the hippocampus. Journal of Low Frequency Noise Vibration and Active Control, 28 (1) pp. 53-60.

Vales K, Stuchlik A. Central muscarinic blockade interferes with learning and retrieval of the Active Allothetic Place avoidance task despite spatial pretraining. Behav. Brain Res., 2005, 161(2): 238-244

Stuchlik A, Vales, K. Systemic administration of MK-801, a non-competitive NMDA-receptor antagonist, elicits a behavioural deficit of rats in the Active Allothetic Place Avoidance (AAPA) task irrespectively of their intact spatial pretraining, Behav. Brain Res., 2005, 159(1): 163-171

50. Blahna, K., Svoboda, J., Telensky, P., Klement, D. Inertial stimuli generated by arena rotation are important for acquisition of the active place avoidance task 2011 Behavioural Brain Research, 216 (1) pp. 207-213.

55. Wesierska, M., Adamska, I., Malinowska, M. Retrospl enial cortex lesion affected segregation of spatial information in place avoidance task in the rat. 2009, Neurobiology of Learning and Memory, 91 (1) pp. 41-49.

73. Dockery, C.A., Wesierska, M.J. A spatial paradigm, the allothetic place avoidance alternation task, for testing visuospatial working memory and skill learning in rats. 2010, Journal of Neuroscience Methods, 191 (2) pp. 215-221.

74. Tran, A.H., Uwano, T., Kimura, T., Hori, E., Katsuki, M., Nishijo, H., Ono, T. Dopamine D1 receptor modulates hippocampal representation plasticity to spatial novelty.2008 Journal of Neuroscience 28 (50), pp. 13390-13400

75. Wesierska, M., Adamska, I., Malinowska, M. Retrosplenial cortex lesion affected segregation of spatial information in place avoidance task in the rat. 2009, Neurobiology of Learning and Memory, 91 (1) pp. 41-49.
