Geographic Citation Map

The citation map shows the distribution of the researcher's citations across the globe:

- For each article in the Web of Science Core Collection that cited the researcher's work, a city with a contributing author's institution represents a data point
- A publication may appear under multiple locations if the contributing authors are affiliated with different institutions
- The number of data points on the map may be higher than the sum of times cited in the Web of Science Core Collection

Blue circles can be clicked to zoom in and see more precise locations, red pins can be clicked to see the details of papers citing the researcher's work from a particular city.

The citation map may take a while to load if there are more than 1,000 citations. ⓘ
