

# Pavel Kočovský – Publikační činnost

Počet citací je uveden v závorce

## Monografie

1. Kočovský, P.; Tureček, F.; Hájiček, J.:  
*Synthesis of Natural Products: Problems of Stereoselectivity*, Vol. 1 and 2, CRC Press, Boca Raton, Florida 1986.

## Kapitoly v monografiích

K sepsání následujících kapitol jsem byl vyzván jakožto mezinárodně uznávaný expert v daném oboru, zejména na základě původních prací publikovaných mojí skupinou.

1. **Kočovský, P.:**  
Mercury Salts, in: *Encyclopedia of Reagents for Organic Synthesis* (L. A. Paquette, Ed.), J. Wiley & Sons: New York **1995**; pp 872, 3242-3248, 3250-3257, 3263-3270.
2. **Kočovský, P.:**  
Electrophilic Additions to C=X Bonds.  
*Chemistry of Functional Groups; Supp. A3: The Chemistry of Double-Bonded Functional Groups* (S. Patai, Ed.); J. Wiley & Sons, Chichester **1997**, 1135.
3. **Kočovský, P.;** Starý, I.:  
Rearrangements of Allylpalladium and Related Derivatives, in: *Organopalladium Chemistry for Organic Synthesis*, (E. Negishi, Ed.), J. Wiley & Sons: New York **2002**, 2011.
4. **Kočovský, P.:**  
MAP and NOBIN, in: *Encyclopedia of Reagents for Organic Synthesis "eEROS"* (L. A. Paquette, Ed.), J. Wiley & Sons: New York **2002**; RN00170 and RN00171.
5. **Kočovský, P.:**  
Allyl trichlorosilane, in: *Encyclopedia of Reagents for Organic Synthesis "eEROS"* (L. A. Paquette, Ed.), J. Wiley & Sons: New York **2004**; RN00568.
6. **Kočovský, P.;** Malkov, A. V.:  
Chiral Lewis Bases as Catalysts  
*Enantioselective Organocatalysis – Reactions and Experimental Procedures* (P. I. Dalko, Ed.), Wiley–VCH, Weinheim: **2007**; 255.
7. **Kočovský, P.;** Stončius, S.:  
Reduction of Imines with Trichlorosilane Catalyzed by Chiral Lewis Bases, In: *Chiral Amine Synthesis (Methods, Developments and Applications)* (T. Nugent, Ed.), J. Wiley & Sons: Chichester **2010**, p. 131.
8. **Kočovský, P.;** Malkov, A. V.:  
Lewis Bases  
*Comprehensive Enantioselective Organocatalysis – Catalysts, Reactions, and Applications* (P. I. Dalko, Ed.), Wiley–VCH, Weinheim: **2013**; Vol 2, p 381.

9. Malkov A. V.; **Kočovský, P.:**  
Lewis Base-Catalyzed Reactions of SiX<sub>3</sub>-Based Reagents with C=O, C=N ( $n \rightarrow \sigma^*$ ), in: *Lewis Base Catalysis in Organic Synthesis*, (E. Vedejs, S. E. Denmark, Eds.), Wiley-VCH: New York **2016**, Vol. 3, 1013-1037.
10. **Kočovský, P.;** Malkov, A. V.:  
Lewis Base-Catalysts in the Reduction of Imines and Ketones with Silanes ( $n \rightarrow \sigma^*$ ), in: *Lewis Base Catalysis in Organic Synthesis*, (E. Vedejs, S. E. Denmark, Eds.), Wiley-VCH: New York **2016**, Vol. 3, 1077-1112.

Od r.1988 jsem jedním z dvanácti kmenových autorů každoroční publikace *Organic Reaction Mechanisms*, která dává kritický pohled na vývoj v organické chemie vždy za uplynulý rok.

11. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1988*, (A.C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons, Chichester **1990**, p 435.
12. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1989*, (A.C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons, Chichester **1991**, p 377.
13. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1990*, (A.C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons, Chichester **1992**, p 397.
14. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1991*, (A.C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons: Chichester, **1993**, p 357.
15. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1992*, (A.C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons, Chichester **1994**, 345.
16. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1993*, (A.C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons, Chichester **1995**, 355.
17. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1994*, (A. C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons: Chichester **1996**, 331.
18. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1995*, (A. C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons: Chichester **1997**, 363.
19. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1996*, (A. C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons: Chichester **1999**, 283.
20. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 1997*, (A. C. Knipe, W. E. Watts, Eds.), J. Wiley & Sons: Chichester **2001**, 391.

Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 2017* (A. C. Knipe, Ed.), J. Wiley & Sons: Chichester **2020**, in press.
40. **Kočovský, P.:**  
Addition Reactions - Polar Additions, in: *Organic Reaction Mechanisms - 2018* (A. C. Knipe, Ed.), J. Wiley & Sons: Chichester **2020**, manuscript in preparation.

## Původní práce

V závorkách je uveden počet citací podle WoS (červeně) a podle Google Scholar (zeleně) a IF daného časopisu v květnu 2019 [modře]. Vzhledem k rozpětí více než 4 dekad není možné uvádět IF k datu publikace. Navíc celkový počet citací zpravidla mnohonásobně převyšuje IF. U časopisů zaniklých před vynálezem IF faktoru (např. hlavní britský časopis *J. Chem. Soc., Perkin Trans. 1*) tento údaj chybí.

Práce publikované v dnes již zaniklém mezinárodním časopisu *Collect. Czech. Chem. Commun.* jsou odsunuty na konec tohoto přehledu.

Některé publikace byly vybrány redakcí jako “hot paper”, “featured article”, “accelerated article”, případně ke “cover page”.

1. Stárka, L.; Hampl, R.; Bičíková, M.; Černý, V.; Fajkoš, J.; Kasal, A.; **Kočovský, P.**; Kohout, L.; Velgová, H.:  
Steroids with Modified Ring A or B: Screening for Potential Antiandrogenic and Synandrogenic Activity  
*J. Steroid Biochem.* **1980**, *13*, 455. (10) [IF = 4.8]
2. **Kočovský, P.**:  
Synthesis of 14-Deoxy-14 $\alpha$ -Strophanthidin  
*Tetrahedron Lett.* **1980**, *21*, 555. (26) [IF = 2.4]
3. **Kočovský, P.**; Tureček, F.:  
Neighboring Group Participation and Rearrangement in Hypobromous Acid Addition to 10 $\beta$ -Vinyl Cholestanes  
*Tetrahedron Lett.* **1981**, *22*, 2699. (12) [IF = 2.4]
4. Tureček, F.; Vereš, K.; **Kočovský, P.**; Pouzar, V.; Fajkoš, J.:  
Deuterium and Tritium Labeling with the Zinc-Sodium Iodide Method

Seznam původních prací v dnes už zaniklém časopisu *Collect. Czech. Chem. Commun.* (zal. E. Votoček a J. Heyrovský). IF se pohyboval v rozpětí 1-1.5

Na vysvětlenou: V dobách minulých bylo velmi obtížné získat od ředitele ÚOCHB, kde jsem pracoval, povolení publikovat v zahraničí. Pouze *Tetrahedron Letters*, tehdy značně prestižní a hlavně mezinárodní časopis, který uveřejňoval jako jeden z mála předběžná krátká sdělení, byl občas povolován. V *Angewandte Chemie* se publikovat nesmělo, neboť to byl "západoněmecký" časopis, tedy vydávaný v nepřátelské zemi. Podobně tomu bylo s časopisy Americké chemické společnosti a Britské chemické společnosti, které byly považovány za národní a tudíž rovněž nepřátelské. K určitému uvolnění došlo až ve druhé polovině 80-tých let, čehož jsem začal využívat; přechod k těmto časopisům nečinil potíže. V pozdějších letech jsem se ke *Collectionu* vracel v souvislosti se speciálními čísly, jichž jsem byl v několika případech editorem.

## Poznámka

Publikace No. **17** je založena na disertační práci Ivo Starého (nyní vedoucího skupiny v ÚOCHB a člena Učené společnosti ČR). Byla první československou disertací v oboru organické chemie, jejíž principální téze byly uveřejněny v *J. Am. Chem. Soc.*

Publikace No. **18** je založena na diplomové práci Ireny Staré (née Stieborové), která za ní dostala Cenu rektora UK a cenu Čs. Chemické společnosti (jako nejlepší diplomovou práci roku).

Publikace No. **21** je založena na diplomové práci Milana Poura (nyní profesora na FaF UK), který za ni dostal Cenu rektora UK. Zároveň to byla první československá diplomka v oboru organické chemie, jejíž principální téze byly uveřejněny v *J. Am. Chem. Soc.*

## Přehledné články

Přehledné články vznikly na pozvání od editorů příslušných časopisů na základě našich původních prací. Ty, které byly publikovány v *Pure Appl. Chem.*, shrnují moje plenární přednášky na IUPAC symposiích. Publikace v *Izv. Akad. Nauk* shrnuje moji plenární přednášku na moskevské konferenci, pořádané u příležitosti 50. výročí založení Nesmeyanova Institutu Ruské AV.
