## Seminar on Collaborative research on High Mountain Cryosphere under the influence of Climate Change

20<sup>th</sup> September-22<sup>nd</sup> September 2022

Faculty of Science, Charles University

*The seminar aims at bringing together people from partner universities of Charles, and Milan to cooperate and share the knowledge about the impact of climate change on Mountain Cryosphere.*

### Activities:

- ❖ Presentations of attending researchers and students about their ongoing work.
- ❖ Lectures and Hands-on exercises: High mountain areas, methods to study their changes and dynamics.
- ❖ Specific session on Belvedere glacier- Monte Rosa (Italian Alps).
- ❖ Round table discussions on future collaborative actions for bachelors and master's students.
- ❖ Informal dinner and outing.

Lecturers from: Charles University, University of Milan, Czech University of Life Sciences.
