

We cordially invite you to an autumn seminar of **UNCE/SCI/006 project**

# Center for Geosphere Dynamics

**November 25, 2021 at 3 pm**  
Ložiskové sbírky, room 120, Albertov 6

## **The following junior researchers will present their results:**

**Martin Slavík:** Accelerated disintegration of in situ disconnected portions of sandstone outcrops

**Filip Košek:** Miniaturized Raman spectrometers for planetary exploration: From aromatics to amino acids

**Filip Tomek:** Magmatic-tectonic evolution of a fracture pattern in granite related to greisen mineral deposits

**Lukáš Laibl:** 510 milion years old larvae and their impact on evolutionary developmental biology of trilobites

*The presentations will be followed by the discussion and light refreshment*
